

Format for the preliminary database of CCA sites in I.R. Iran

Basic data (please provide all)

Site Name (in local language and in English)	Soldouz (or
Site Traine (in 100ai language and in English)	Sirangoli)
	wetland
Country (Province)	Naghadeh
	(West
	Azerbaijan
	Province)
Area encompassed by the CCA (specify unit of measurement).	4500 ha
GIS Coordinates (if available)	
Whether it includes sea areas (Yes or no)	No
Whether it includes freshwater (Yes or no)	Yes (brackish)
Marine (Y or N)	No
Concerned community (name and approx. number of persons)	Naghadeh and
	surrounding
	villages
Is the community considering itself an indigenous people? (Please note Yes or	Yes (Azeri)
No; if yes note which people)	
Is the community considering itself a minority? (Please note Yes or No, if yes on	Yes
the basis of what, e.g. religion, ethnicity)	
Is the community permanently settled? (Please note Yes or No; if the community	Yes
is mobile, does it have a customary transhumance territory?)	
Is the community local per capita income inferior, basically the same or superior to national value? (please note how confident you are about the information)	Same or Less
Is the CCA recognised as a protected area by governmental agencies? (Yes or no;	Yes (after
if yes, how? If no, is it otherwise recognized?) If yes, legal document?	1963 it has
Establishment date?	become part of
	government
	land)
Conflicts with land tenure, natural resource use?	Yes
What is the main management objective (e.g. livelihood, cultural, spiritual)	Livelihood
	and cultural
By definition, a CCA fulfils a management objective. To which IUCN	TBD
management category do you consider it would best fit (this does not imply that	
the management objective is consciously pursued by the concerned community,	
but that it is actually achieved)	

Additional qualitative information

Aaaiionai quaiiiaiive injormaiion	
Main ecosystem type	Wetland
Description of biodiversity & resources (ecosystems, species, functions) conserved by the CCA	A variety of plant and animal species (incl. migratory birds)
Description of local ethnic groups and languages spoken	Azeri
Broad historical context of the CCA	For centuries the local communities have managed water resources of the wetlands on the southern part of the Uromiyeh Lake such that there was a

Fig. 1 – Soldouz (or Siran Goli) Wetland is a Satellite Wetland on the southern tip of the Lake Uromiyeh Ramsar Site. This wetland has been revived through local community efforts (GEF/SGP funded project)

Fig. 2 – Soldouz and surrounding wetlands known as "The Green Belt" have been an important life support system for rangelands and grazing of livestock, an important livelihood for the local communities of this region of Iran
