

Comments received at the 2018 EGA and RAs

- This is a deliberate high standard policy, but it recognises the diversity of visions and accross the world
- Regional Assemblies need time to review the policy
- Existing actions on this issue in ICCAs must be collected and taken into account
- The implementation indicators for the program will have to be detailed, to go further than the policy
- Importance of starting from the base, from each communities, to know how do they want to work on this.
